

3D on the Internet

For a pair of free glasses,
email liz@Image3D.com
and ask for [anaglyph glasses](#).

To view **3D images** or videos,
search for "anaglyph"
or "anaglyph" + a word
such as "mountain" or "flower."

Pop-up anaglyphs, also
called phantograms, are viewed
with the computer or phone screen horizontal.

Images appear to rise
from the screen.

(Phantogram, a musical group,
will also appear in a search
for that word.)

You can make your own 3D images,
with or without a 3D camera
such as the Fuji W3,
and free computer software.

Members of the

Cascade Stereoscopic Club

are willing to help. 3D is a wonderful hobby.

Club information is at 3Dpdx.org

You are welcome at our monthly meetings!
