

Cascade Stereoscopic Club

A Portal to Your Inner Vision

The Cascade Stereoscopic Club is your primary destination as you journey to learn how the vision of your realities can be preserved beyond your lifetime by the media of stereoscopic art. The Cascade Stereoscopic Club (CSC) centers on the world of stereography. The former 3D Center of Art & Photography was the result of the pioneering dreams of members of the Cascade Stereoscopic Club. CSC is dedicated to presenting and preserving 3-dimensional images through monthly meetings, mentoring, sharing your art, an online discussion group, and public outreach.

— The educational agenda of CSC is to teach anyone interested how to capture the reality of what we see in those original three dimensions. The most popular methods involve stereo photography. By making an image of the same scene from two slightly different positions at the same time, a stereoscopic photograph is created. By viewing the two images in such a way that the left image is presented only to the left eye, and the right image to the right eye, the image is seen in true stereoscopic 3D. Your brain does it and the resulting image has all the cues of a flat photograph,

plus the depth that flat images do not have. Observers of 3D images feel as if they stepped into the actual scene where the photograph was taken. 3D images are usually made with a two lens camera, whether it be still images or movies. Two identical cameras can be used together with synchronized shutters as is evidenced by the 3D digital images being made today. By shifting a single camera between the left and right shot, excellent still life images can be made. 3D images can be viewed by various means of projection, with hand-held viewers, and as digital displays on your personal computer. The Cascade Stereoscopic Club offers many venues which will get you started fulfilling your 3D imagination.

Gladstone, OR 97027

CSC was the first photography club in the world to be approved by PSA to conduct stereoscopic competitions and exhibitions of digital imagery via the Internet! Visit our website where you will find the archives of 3D images of past exhibitions.

CSC hosts annually a PSA approved stereoscopic exhibition in which anyone may submit digital stereoscopic images.

- Monthly newsletter
- Workshops and tutorials
- CSC, PSA & ISU digital competitions
- Advice on better images, techniques & equipment
- Digital Stereo Photography tutorials
- Online discussion groups on 3D still images/movies
- Friendship and fun
