

So you like 3D movies!

So do we! Maybe you'd like to come to our 3D Club meeting, and learn about the world's best hobby!

Learn how to make your own 3D !

- with a digital 3D camera or a regular camera!
- using free software to make photos you can print or email.

We'll show you how.

Learn how to find 3D photos and videos on the internet.
Google "anaglyph" to see them. For free glasses, email liz@image3d.com, or come to our meeting.

At our meetings, we have 3D photo sharing, with monthly themes, on a big screen. We'll show you how to enter your photos, or you can just come to watch. There are also interesting presentations, and light snacks. All are welcome, especially beginners! We are happy to answer questions about 3D! We are all excited about 3D, and we think 3D photos are so much better than flat ones!

We are the Cascade Stereoscopic Club.

We've been going since 1994.

3D photography is new in many ways, but it started in the 1860s!

Come to a meeting on the 4th Monday of the month (not Dec. 2017)
at 4211 SE International Way, Suite D, Milwaukie 97222.

We'll help you find it.

If you have a 3D TV, we will give you a free Blu-Ray 3D slide show, containing 3D photos by our members.

Go to our website, 3dpdx.org.

If you can't come to a meeting,

we'd still like to help you get into the world of 3D!
